

Experion PKS: Fundamentals – TPS to Experion PKS/Experion LCN System Integration Overview – Certified Associate

Certification Overview

Certification test number: EXP-1021-CT
Certification test length: Up to 4 hours

The HPS Automation College Certification program provides a means for students to demonstrate that they have mastered the content of critical courses.

Based on specific employee roles, Honeywell Certified Associate (HCA) certification verifies student mastery of fundamental knowledge of the core product training content.

For Associate certification, the requirement is to successfully complete the training course and any pre-requisites for that course. Then, the student must successfully pass (at a level of 80% correct) a comprehensive examination.

The examination is proctored and closed-book. The examination is offered at Automation College facilities, and following on-site training. Students register for the examination as they would a course. They have up to four hours to complete the examination, but it will normally require no more than 90 minutes to complete. In the event they fail the first examination, a second can be taken within the next 30 days.

Certification Benefits

Honeywell Certified Associate certification program:

- Provides evidence to employers that employees did not merely attend a course, but gained specific knowledge
- Helps employers address regulatory and quality requirements involving employee performance
- Ensures complete understanding of HPS products by operators, maintenance technicians, administrators, and installation specialists, and so increase the optimum use of these products for efficiency and safety
- Allows the individual employee to validate that he or she has understood the breadth of course material

Certification Delivery Options

- In-Center at a Honeywell Automation College facility

Who Should Take This Certification?

Primarily intended for engineers and Technicians who integrate/migrate LCN nodes into an Experion system and will be responsible for planning, installing, supporting and administering the Honeywell Experion LCN.

Prerequisite/Skill Requirements

Prerequisite Course(s)

- (EXP-1021 or EXP-1021-AT)

Required Skills and/or Experience

- Attendees of this course must possess a high degree of technical knowledge and a familiarity with the LCN and Experion process control systems

Desirable Skills and/or Experience

- Working knowledge of Windows Server 2016 or Windows 10

Additional Training

To increase your knowledge and skills, there are additional courses available from Automation College.
